## WORK EXPERIENCE

---

### Marist College Administrative Computing

Sept. 2019 - Present

Student Software Engineer

Poughkeepsie, NY

- Developing web portlets for the Marist College student portal, such as housing forms and administrative tools.
- Utilizing a Java backend with the Liferay framework, Javascript, SQL, HTML, and CSS.
- Transitioned to a remote position for the summer of 2020

### Tangen Biosciences

April 2019 - Dec. 2019

Software Engineering Intern

Branford, CT

- Designed, developed, and deployed an internal web server to manage data collected from instruments
- Various smaller supplemental projects utilizing C#, Python, HTML, CSS, Javascript, SQL, and Git.
- Deployed an IIS webserver and an MSSQL server.

### YellowBrick Realty

June 2018 - Aug. 2018

Graphic Designer & Social Media Management

Milford, CT

- Designed various graphics and advertisements in Adobe Photoshop and Adobe Illustrator.
- Managed social media posts on various platforms including Instagram, Twitter, and Facebook.

## PROJECTS & RELEVANT EXPERIENCE

---

### Pilot RC Ground Control Software

June 2020 - Present

Drone Logging and Monitoring

Schindler Electronics

- Developed and am currently maintaining pieces of software to log and monitor telemetric data for use in-flight while piloting custom built quadcopter and VTOL flight systems based on the Pilot RC microcontroller.

### Tangen Data Portal (Releases 1 & 2)

April 2019 - Dec. 2019

Internal Webserver & Database

Tangen Biosciences

- Internal webserver that I designed, developed, and deployed during my summer internship.
- During winter 2019 I developed the second release of this software and deployed it in December.

Other projects available via LinkedIn and my personal website (<https://griffinpuc.github.io>)
